

360 VIDEO BOOTH

Our 360 video booth captures all of the fun of your event in high definition. Guests stand in the middle of the booth as the camera rotates round.

With this innovative video 360 booth, you can capture the entire event experience in stunning ultra-high definition videos. Not only that, but the 360 booth also offers an added overlay filter and a slow-motion boomerang effect, adding a touch of creativity and fun to your videos and event. Guests simply stand (or dance and pose!) in the centre as the 360 booth spins around them. The moment is captured in video, and after the event you will receive a download link for your videos.

You can customize the booth with your own branding or event theme, making it a seamless addition to your overall event experience. Plus, the 360 booth is easy to set up and operate, so you don't have to worry about any technical difficulties on the day of your event.
