

DRINKS PRINTER

Be at the forefront of modern technology
and boost your brand in edible print!
Our printer can transfer your logo onto
almost any edible item—yum!

Printed in monochrome, our edible printing machine can turn your event from wow to WOW! Make your brand really stand out as it's printed directly onto your chosen edible food or drink! The most Instagrammable product that's sure to make your event a huge hit!

How does it work? You can choose your design (or let your guests upload their own images!) and send it to the app (you can do this in advance if you wish). Send it to the printer wirelessly and voila, your print will appear on top of your chosen item!

With up to 100 prints per hour, the options are unlimited, provided that the top of your printed area is flat and a light colour so you can see the print! Use cappuccinos, beer, milkshakes, ice cream, cookies, cakes... you choose!
